Aaron Garland

aaron@mytigertiger.com 970-515-7891 Life Coach for Young Adults www.mytigertiger.com **Executive function and self-regulation** skills are the mental processes that enable us to plan, focus attention, remember instructions, and juggle multiple tasks successfully. Just as an air traffic control system at a busy airport safely manages the arrivals and departures of many aircraft on multiple runways, the brain needs this skill set to filter distractions, prioritize tasks, set and achieve goals, and control impulses.

-Center of Developing Child, Harvard University

EXECUTIVE SKILLS: 11 Skill Areas

Skill	Definition
Response Inhibition	The ability to stop one's own behavior at the appropriate time, including stopping actions and thoughts. The flip side of inhibition is impulsivity; if you have weak ability to stop yourself from acting on your impulses, then you are "impulsive."
Working memory	The capacity to hold information in mind for the purpose of completing a task.
Emotional Control	The ability to modulate emotional responses by bringing rational thought to bear on feelings.
Sustained Attention	The capacity to keep paying attention to a situation or task in spite of distractibility, fatigue or boredom.
Task Initiation	The ability to begin a task or activity and to independently generate ideas, responses, or problem-solving strategies.
Planning/prioritization	The ability to manage current and future- oriented task demands.
Organization	The ability to impose order on work, play, and storage spaces.
Time Management	The capacity to estimate how much time one has, how to allocate it, an how to stay within time limits or deadlines.
Goal-Directed Persistence	The capacity to have a goal, to follow through to completion of the goal, and not be put off or distracted by competing interests.
Flexibility	The ability to move freely from one situation to another and to think flexibly in order to respond appropriately to the situation.
Metacognition	The ability to stand back and take a bird's-eye-view of yourself in a situation, to observe how you problem-solve. It also includes self-monitoring and self-evaluative skills.

How to Study for Tests

- 1. Keep a monthly calendar with the student to record any upcoming tests.
- From 5 days to 1 week before the test, devise a study plan with the student.
- 3. Using the Menu of Study Strategies, have the student decide which strategies he or she wants to use to study for the test. Make sure the student understands what is involved in each strategy, providing further explanation if necessary (e.g., if the student chooses "Study flash cards," ask him or her to show what the flash cards will look like, giving additional suggestions for flash card design).
- 4. Have the student make a plan for studying that starts 4 days before the test. Vast psychological research shows that in learning new material, distributed practice is more effective than massed practice. In other words, if a student plans to spend 2 hours studying for a test, it is better to break down the study time into smaller segments over a longer period (e.g., 30 minutes a night for four nights) than study for a 2-hour block the night before the test. Research also shows that learning is consolidated through sleep, so getting a good night's sleep before an exam is more beneficial than "cramming" the night before.
- 5. If the student has problems with sustained attention, it may be easier to use several strategies, each for a short amount of time, than using one strategy for the full study period. You can suggest that the student set a kitchen timer for the length of time for each strategy, and when the bell rings, the student can move on to the next strategy (unless he or she prefers the strategy being used and wants to continue it).
- After the student takes the test, have him or her complete the posttest evaluation. This builds selfevaluation so that improvements can be made and implemented for the next test.

How to Study for Tests (page 2 of 2)

MENU OF STUDY STRATEGIES

Check off the ones you will use. ___ 1. Reread text ___ 2. Reread/organize notes ___ 3. Read/recite main points 5. Highlight text 4. Outline text ___ 6. Highlight notes ___ 8. Make concept maps ___ 7. Use study guide ___ 9. Make lists/organize ___ 10. Take practice test ___ 11. Quiz myself ___ 12. Have someone else quiz me ___ 14. Memorize/rehearse ___ 13. Study flash cards ___ 15. Create a "cheat sheet" ___ 16. Study with friend ___ 17. Study with study group ___ 18. Study session with teacher ____ 19. Study with a parent ____ 20. Ask for help ___ 21. Other:

STUDY PLAN

Date [Day	Which strategies will I use? (write #)	How much time for each strategy?
4	4 days before test	1.	1.
		2.	2.
		3.	3.
:	3 days before test	1.	1.
		2.	2.
		3.	3.
2	2 days before test	1.	1.
		2.	2.
		3.	3.
	1 day before test	1.	1.
		2.	2.
		3.	3.

POSTTEST EVALUATION: How did your plan for studying work out? Answer the following questions:

- 1. What strategies worked best?
- 2. What strategies were not so helpful?
- 3. Did you spend enough time studying? Yes No
- 4. If no, what more should you have done?
- 5. What will you do differently the next time?

How to Organize Notebooks/Homework

- With input from the student, decide on what needs to be included in the organizational system: A
 place to keep unfinished homework? A separate place to keep completed homework? A place to
 keep papers that need to be filed? Notebooks or binders to keep notes, completed assignments,
 handouts, and worksheets? A sample list is included in the checklist that follows.
- Once you've listed all these elements, decide how best to handle them, one at a time. For example, you and the student might decide on a colored folder system, with a different color for completed assignments, unfinished work, and other papers. Or you might decide to have a separate small three-ring binder for each subject or one large binder to handle all subjects.
- Make a list of the materials the student needs—these might include a three-hole punch, lined and unlined paper, subject dividers, and small Post-it packages the student can use to flag important papers.
- Ask the student to procure the necessary materials if they are not available at school. It may be necessary to e-mail the student's parents to ensure that the materials are obtained.
- 5. Set up the notebooks and folders, labeling everything clearly.
- 6. Help the student maintain the system over time. This generally means a daily check-in, which might include having the student take out the folders for completed assignments, unfinished work, and material to be filed. Have the student make a decision about each piece of material and where it should go.

How to Organize Notebooks/Homework (page 2 of 2)

SETTING UP A NOTEBOOK/HOMEWORK MANAGEMENT SYSTEM

System element	What will you use?	Got it (✓)
Place for unfinished homework		
Place for completed assignments		
Place to keep materials for later filing		
Notebooks or binder(s) for each subject		
Other things you might need: 1. 2.		
3. 4.		

MAINTAINING A NOTEBOOK/HOMEWORK MANAGEMENT SYSTEM

Task	Monday	Tuesday	Wednesday	Thursday	Weekend
Clean out "to be filed" folder.					
Go through notebooks and books for other loose papers and file them.					
Place all assignments (both finished and unfinished) in appropriate places.					

Executive Skills Tip Sheets

This sheet gives definitions of each executive skill included in the Executive Skills Problem Checklist, along with tips and things you can say to yourself to get better at that skill. As you read through the suggestions, circle or highlight those ideas that you think might work for you.

Response Inhibition—being able to control your impulses so that you can think before you act, resist peer pressure, and make good choices (for example, choosing to study rather than do more appealing activities).

Tips	Self-Talk*
Be aware of your unique temptations and make a plan to avoid them.	First work, then play.
Ask yourself, "Good choice or bad choice?"	Learn from your mistakes.
 Practice waiting (for example, add a little more time or work before giving yourself the reward). 	Stop and think.Your own idea:
Other strategies:	

Working Memory—being able to keep in mind everything you have to remember—and remembering what worked the last time.

Tips	Self-Talk
Get teachers' permission to e-mail assignments.	Am I forgetting anything?
Do all work on iPad or tablet so it's always with you.	Check your list.
 Use colored markers to highlight instructions (use different colors to signal different things, such as green for the most important, red for things you might be likely to forget). 	Check your agenda.Your own idea:
Set reminders with time and sound cue on your smartphone.	
Make checklists.	
Other strategies:	

^{*}Self-talk means giving yourself instructions, words of encouragement, or prompts to remind you what you're working on and what your goal is.

Executive Skills Tip Sheets (cont.)

Emotional Control—being able to manage your feelings so they don't get in the way of getting work done or meeting goals.

Tips	Self-Talk
 Label the feeling and let it go. When you can, walk away from the upsetting situation, get ahold of yourself, and come back. Look into learning meditation techniques. Pat yourself on the back when you stay cool. Other strategies: 	 Take 10. Take deep breaths. This, too, shall pass. Big deal or little deal? Your own idea:

Sustained Attention—staying on task, getting things done in the time you've given yourself to do them, even if you're tired, bored, or have more appealing distractions.

Tips	Self-Talk
Set realistic work goals and stick to them.	You can't walk away from this.
Take planned breaks and get back to work on schedule.	Don't quit now.
Gather all necessary materials before beginning a task.	Back to work.
Build in rewards for completing tasks.	First work, then play.
Other strategies:	Your own idea:
	that's an action.

Task Initiation—being able to make yourself start a task. If you've seen yourself getting closer to your goal, this is the first step on that path. If you don't take this step, you can't get closer.

Tips	Self-Talk
Pick the task (make it small).	Just do it.
Pick the start time.	Take baby steps.
Pick the minimum work time.	Start small.
Pick the cue to start.	Your own idea:
Other strategies:	. Spend five minutes every day staying or junized.
	Other strategies:

Executive Skills Tip Sheets (cont.)

Flexibility—the ability to adapt to unexpected events and to come up with multiple solutions to problems.

Tips

- Notice the physical warning signs of inflexibility (muscle tightness, breathing changes) and ask yourself if you can find a way to be flexible.
- Whenever you have to make a decision about something, ask yourself, "What could go wrong and what's Plan B if this doesn't work?"
- Other strategies:

Self-Talk

- Big deal or little deal?
- · What are your options?
- What's Plan B?
- Is there another way to think about this?
- Your own idea:

Planning/Prioritization—planning is your road map, your GPS. When you have a good plan, you know all the turns you have to make and how to get past the roadblocks along the way. You also know how to focus on what's most important and let the little things go.

Tips

- Use the planning forms in this agenda (long-term projects; test study plan).
- Ask teachers for a preview of a lecture or to tell you what are the most important concepts to focus on when studying for tests. (Teachers who provide study guides for tests make this easy!)
- When you have written instructions for homework assignments, underline and number each instruction that's an action.
- Other strategies:

Self-Talk

- What's your destination?
- Your plan will be a built-in GPS to get there.
- Map the route.
- What comes first, next, and next, and what do you need to give up to get there?
- First things first.
- Your own idea:

Organization—having a system for keeping track of information and materials, especially the things you need every day (homework, notebooks, keys, phone, sports equipment, etc.)—putting everything in its place, so when you look for it, it's there.

Tips

- Use laptop or iPad for managing information/ assignments/class notes.
- Use a note organizer app such as OneNote or Evernote.
- Spend five minutes every day staying organized.
- Other strategies:

Self-Talk

- A place for everything and everything in its place.
- Do you have it together?
- Your own idea:

Executive Skills Tip Sheets (cont.)

Time management—Each day is a 24-hour shot clock. Time management allows you to manage the tug of war between what you want to do, what you need to do, and what others ask you to do.

Tips

- Use this planner to make daily plans.
- Estimate how long a task will take—and check to see if you were right.
- Break homework down into short time segments. (Pomodoro is a smartphone app that helps you do that.)
- Other strategies:

Self-Talk

- How much time do you have?
- · Are you on track?
- What you need to do comes before what you want to do.
- Honestly, how long will it really take?
- Each day is like a shot clock in a game.
- Your own idea:

Goal-Directed Persistence—This is a giant version of sustained attention: You have a goal, and you're determined to get there. What you do on a day-to-day basis gets you to that goal, and keeping this in mind helps you connect immediate actions and consequences with other ones down the road.

Tips

- Make daily study plans to build a sense of accomplishment.
- Set any goal related to schoolwork, and if the goal isn't met, make it smaller, more attainable.
- Place a picture of your goal in a prominent place to remind you what you're working on.
- · Other strategies:

Self-Talk

- What are you working on?
- Are you on track?
- Don't give up now.
- Keep your eye on the prize.
- Will this help you get to your goal?
- Your own idea:

Metacognition—What did I do + why did I do it = what will I do the next time? Metacognition is your brain's life lesson machine. It allows you to look at your past actions and behaviors, analyze them, and use that information to make more informed decisions about how to act in the future.

Tips

- Ask teachers for a test study guide.
- Create error-monitoring checklists (for example, a proofreading checklist).
- Create your own study packets for tests by pulling together all important material and stapling it together with a cover.
- Ask four self-monitoring questions: "What is my problem?"
 "What is my plan?" "Am I following my plan?" "How did I do?"
- Other strategies:

Self-Talk

- What's the big picture?
- · How are you doing?
- What worked for you before?
- · What didn't?
- What do you need or want for a grade?
- Have you studied enough to get it?
- · Your own idea:
